

ACCOUNTING, ECONOMICS AND BUSINESS STUDIES

ACCOUNTING

Accounting is the systematic method of gathering, recording and analysing financial transactions in the businesses to fairly present the financial affairs of the business. Accounting at high school level provide learners with the skills and expertise to prepare a set of accounting books and to understand the different aspects of a business. Learners can pursue the following careers in the accounting and financial field such as Bookkeepers, Creditors and Debtors Controllers, Financial Accountants and Chartered Accountants. Accountants have a clear career path that offers many opportunities and good earning potential. Accountants provide credible information in a company's financial statement and can be useful to the various stakeholders. Accounting is the backbone of a business.

ECONOMICS

The study of economics enables us to understand people, businesses, markets and government. Economics assist in decision making techniques with regards to scarcity and how it affects the use of resources. Economics cultivates the development of skills such as critical thinking, data analysis, problem solving, time management and teamwork. Resources around the world are getting depleted. This needs good decision-making skills to efficiently allocate the limited resources. Our economy is on its knees, and it needs to tackle our current macro-economic problems, such as: unemployment, declining currency, and high budget deficits. The increase in the study of economics will allow for a better economic environment. The study of economics also caters for high paying career opportunities.

BUSINESS STUDIES

Business Studies is a combination of Business Environment, General Management, Professionalism, Marketing, Investments, Social Responsibility and various other interesting topics. This subject prepares learners for careers such as Human Resources, Entrepreneurship, International Business, Marketing and Management. Business Studies enables learners to understand and appreciate the basic business environment issues that affect society and allows them to make responsible decisions.
